

National Guard CBRN Response Enterprise (CRE) Exercise Support

IIF Data Solutions, Inc. (IIF) provides the complete, best value solution for States requiring Role Player and Lanes Training Support for National Guard CBRN Response Enterprise (CRE) Training exercises. Our comprehensive technical understanding of Role Player Support requirements comes directly from our first-hand experience of providing quality Role Player Support Services (RPSS) since 2008 for over **60** National Guard **Vigilant Guard (VG)** exercises, **HRF and CERFP External Evaluations**, and other **Special Focus Exercises** including **Patriot and Joint Eagle**. Together with our teaming partners, we can provide your total Exercise training solution. We understand the unique nature and challenges of conducting CRE exercises and have provided high-quality Role Players and Structural Collapse Venue Site (SCVS) Build/Reset and other CRE Lanes training aids to the CBRN Enterprise that has become **the benchmark standard**.

Our SCVS Teaming partners **have developed dozens of SCS venues** in various sizes and configurations. They each use a development team to design and construct the best, safest SCVS possible for the end user that provides training and problem solving. The SCVS “Training Prop” must not just look like a collapse but must act like a collapse, so the prop will breathe, sound and draw like a real collapse. In a real collapse, there is chaos and in the chaos, solving problems is what it takes to create order and save lives. An effective SCVS training prop must provide “problems” to solve not just lanes to train on.

IIF has provided experienced NIMS Subject Matter Experts (SMEs) to role-play Incident and Area Commanders and staff for numerous National Guard exercises since 2011. In addition to HSEEP and ICS training/certifications as well as EDMSIM training and experience, our SMEs have hands-on “real-world” experience as well as “simulation cell” experience as Incident Commanders/Area Commanders (ICs/ACs). Our bench of IC/AC SMEs surpasses the requisite technical, educational, and professional experience in the disciplines of Fire Rescue, HazMat, EMS, Law Enforcement and Emergency Management.

IIF has the proven capability, superior past performance, and current experience to support CRE exercises, large and small. As a testimonial to this, IIF provided NGB J37 Role Player Support for all TY 13 CERFP and HRF ExEvals as well as VG exercises. Additionally, as Prime Contractor for our SCVS partners, our team provided SCVS Resets in support of TY13 HRFs and CERFPs, reset and enhancement for CERFPs, and numerous VG SCVS Builds. IIF continued to provide these services on the majority of TY 14 exercises as well.

IIF provides superior program management and exemplary customer support. Our Program Manager works in concert with the exercise planners to develop and integrate all requirements to the Customers’ unique exercise objectives, a total turnkey solution.

Superior Role Player Support: IIF consistently delivers the right quantity, quality and type of role players and mannequins at the locations, times and for the conditions needed. We have an extensive and efficient recruiting process based on over 7 years of successful past performance that guarantees the right numbers at the right times. IIF hires, trains and manages Role Players and prepares realistic presentations for Role Players and mannequins IAW exercise objectives and flow rates. All logistics and geographic issues as well as moulage presentations, victim/patient flow rates, including recycling/re-insertion of Role Players, is managed to execute these exercises successfully and realistically.

Unmatched Expertise for SCVS Builds, Resets, and Enhancements: Under subcontract to IIF, our SCVS partners provide Search and Extraction props of adequate size and complexity to allow multiple training lanes to be used simultaneously and meet industry, state and local safety standards. They develop venues that create the appearance of a “real world” collapsed structure that allows National Guard units and First Responders to develop expertise for dealing with real disasters. IAW the overarching T&EO, they enable training to conduct:

- Search and Extraction Deployment Operations
- Rope Extraction Operations
- Lifting/Hauling/Shoring Operations
- Search and Extraction Operations

We provide SMEs to perform as Urban Search and Rescue trainers and liaisons with the ICs/ACs, JITEC and the customer to ensure maximum training and exercise value is provided.

Our team’s TY13 RPSS and SCVS past performance includes: OH HRF ExEval, HI CERFP ExEval and CERFP MTT, NE CERFP ExEval and CERFP MTT, IL CERFP ExEval and CERFP MTT, CO CERFP ExEval and CERFP MTT, CA HRF ExEval and HRF MTT, AL CERFP ExEval and CERFP MTT, VG AR (in OK), VA CERFP ExEval, MA HRF MTT, FL VG, CO VG, ME CERFP, Joint Eagle, and Patriot 2013. Additionally, in TY 14 our team has been awarded contracts/subcontracts for VG ME, GA HRF, TX HRF, FL CERFP and SFE, VG AK, NY HRF, VG PA, NE MTT, NV CERFP, Patriot, PA HRF, WA HRF, Vibrant Response, OR CERFP, and UT Vigilant Guard and HRF exercises.

We encourage you to verify our superior past performance with any of these customers.

Contracting: IIF is a woman-owned large business with active SAM registration and GSA MOBIS FSS. DUNS: 114706695 | CAGE Code: 1LM30 | IIF GSA MOBIS FSS: GS-10F-0171N
